2. Had
3. Was
4. Was
5. Buys
6. Keep
7. Attracting
8. Expanding
9. Moved
10. Developed

**IV. Answer**

The first happy event of my life was when I recovered from an accident at the age of 10, after being unconscious for 2 weeks in the hospital and having to rest for about 2 weeks at home.

The second happy memory for me is being able to continue my schooling to the level of junior high school education (MTS) which previously my parents had said they were unable to send me to the next level. In between that I worked as a farmer following my aunt and uncle.

When I was in the first grade of junior high school I was ranked in the top 3 and when I went to grade 2 I entered the favorite class in junior high school, but when I entered the favorite class I didn't even enter the top 3 again, instead I was at the back of the order and finally when I was in grade 3 I entered the regular class.

The same dilemma when I graduated from junior high school was also hopeless to continue to the senior high school level and what made me happy was that I could continue my education to the senior high school level because a neighbor provided information regarding free schools.

I finally entered a vocational high school with a major in accounting, because I was categorized as an underprivileged student, I was given training and employed by the school to make chalk and educational games from grade 1 to grade 2 semester 1.

When I was in my second semester, I did my internship according to the school program at BMT Ummat in 2004, after completing my internship I was offered by the general manager to work part-time and I finally accepted to work part-time after school.

studying and working part-time activities I did until grade 3 after graduating in 2006 I continued to work at BMT Ummat until 2007 because at the end of 2007 BMT ummat collapsed.

In 2007 I finally continued working at the amil zakat institution and computer rental until 2009, in 2009 I was accepted to work at an IT company (Software House) in Malang, this was the starting point for me to work in the IT field until now.

In 2011 I decided to apply to an it company located in mampang prapatan south jakarta and during the interview it turned out that the company moved to bekasi. finally I was accepted by the company and worked until 2018.

In 2018 to 2020 I moved companies to be able to survive in Bekasi and at the end of 2020 I was accepted by the IT company where I work now.

maybe that's all I can say regarding happy life memories, thank you.
